

SKILLS

AI and ML
OpenAI API, Azure OpenAI, RAG, LangChain, PyTorch, LangGraph, LLM agents

Front end
TypeScript, JavaScript (ES6+), React, Next.js, Redux, Tailwind CSS, HTML5, CSS3

Canvas and 2D graphics
HTML5 Canvas, Three.js, Konva.js, Fabric.js, D3.js, PDF.js

Back end and data
Python (FastAPI, Django, Flask), Go, Node.js, REST APIs, PostgreSQL, MySQL

EDUCATION

Bachelor of Computer Science
Singapore University of Technology and Design, 2015 - 2018

Ryan Lin

AI Full-Stack Software Engineer

SUMMARY

AI full stack developer with 8 years of experience across bid and procurement data tools, Kubernetes scaling software and LLM document extraction. Builds React and Next.js front ends, including canvas and three.js, on Python and Go services.

EXPERIENCE

AI Full Stack Developer - Jaburg Wilk
2024 – 2026

Law firm of about 80 people, Phoenix, Arizona

- Built an internal document Q&A assistant with retrieval-augmented generation (FastAPI, pgvector, GPT-4o), with every answer cited to its source pages.
- Built a document viewer with PDF.js and an HTML5 Canvas overlay (react-konva) where reviewers draw, move and resize extraction boxes, with zoom, snapping and undo/redo.
- Extracted clauses, parties and key dates from scanned documents using Azure AI Document Intelligence and structured outputs, with a human review step.
- Shipped the Next.js and TypeScript front end with Entra ID single sign-on, and agent workflows with LangGraph and MCP.

Stack: Python 3.12, FastAPI, Next.js 14/15, React 18/19, TypeScript 5, react-konva, PostgreSQL 16, pgvector, GPT-4o, LangGraph, Azure

Full Stack Engineer - rTurner Consulting
2021 – 2024

Government-contracting consulting firm with federal procurement data products

- Built web applications for searching federal opportunities, contract awards and vendors with Django, PostgreSQL, Elasticsearch 6 and React 16.
- Wrote Python ETL pipelines (pandas, Celery) loading FPDS-NG, USAspending.gov and FedBizOpps data nightly.
- Automated pricing models and market reports used in bids and proposals, with interactive D3.js charts and scikit-learn classifiers that tag opportunities by service category.

Stack: Python 3.6/3.7, Django 1.11–2.2, React 16, PostgreSQL 10, Elasticsearch 6, Celery, scikit-learn, D3.js, Docker, AWS

Full Stack Developer - Liber Pharmaceuticals
2018 – 2021

Australian therapeutic-products business (began as Nicovape)

- Developed internal web tools to track product inventory, supplier orders and distribution records using Django, PostgreSQL and React.
- Built Python data-import and reporting workflows (pandas, Celery) to reconcile stock movements and generate operational summaries.
- Created role-based dashboards for product records, fulfillment status and document review, with REST APIs and audit-friendly change histories.

Stack: Python 3.6-3.9. Django 2.2/3.2, React 16/17, JavaScript, PostgreSQL 10-12, pandas, Celery, REST APIs, Docker, AWS
